

RITE NOW @ ROP

With over one million swimming pools and six hundred miles of beaches, Florida has tremendous need for lifeguards. To prepare for this in-demand job, Hope Forest Academy students participated in a rigorous lifeguard certification preparatory course through the Red Cross. The class was not easy; participants had to swim 300 meters, tread water for 2 minutes, demonstrate perfect swimming technique and perform both active and passive rescue procedures. Three students successfully completed the class and are eligible for certification upon graduation. All are excited about having the skills needed for lifeguarding employment.
